## General Attributes

Assets

Features

Specialties
-------------

- Perform checks by adding your ability / capability score and any appropriate lifepaths, attributes, or aid to a d20 roll
- The target is rated by absolute difficulty, 5 – 20, and up to four additional relative difficulty factors may be added to it
- You pass the check if your total roll meets or exceeds the target; and auto-pass on a natural 20, or auto-miss on a 1

- Perform tasks with a job by rolling D10's equal to the sum of it's level, inherited ability score, and any aiding dice
- The threshold is set by the appropriate difficulty based on your agenda, rated 1 – 4, plus additional relative factors
- Count your passes by looking for numbers rolled within the range of the inherited ability rank for the job (eg. 7-10 for Br)
- Any dice that fall out of their range may be re-rolled by KISSing them: using kismet, insights, stunts, and/or specialties
- If your total passes meets or exceeds the threshold, then you succeed; but if you fail, then you mark exp for the job
